SESAME - An Integrated Economic and Social Accounting System

Posted on 14 September 2011

Author

Steven J. Keuning

Purpose

The following is taken from an article written by Steven J. Keuning titled "SESAME: An Integrated Economic and Social Accounting System". The article outlines a statistical information system that serves to monitor and analyse the interactions between economic development and social change. This is so called SESAME links the monetary data in the national accounts to non-monetary social and environmental data, and yields a consistent set of core indicators on the development of national welfare. Listed below are some of the objectives listed in the article.

Project Goals / Aspirations

Net domestic product growth

Balance of payment equilibrium

Low inflation

Full employment

An equitable income distribution

A high educational attainment

An overall satisfactory nutritional situation

An optimal distribution of paid and unpaid work between men and women

Sustainable use of environmental functions

How do the SESAME goals fit within the MAP2010 framework?

for more information on the MAP2010 frameworks see here

What is MAP 2.0 all About?
